Keep Going! Stay Motivated to Be Active

Physical activity is a great way for older adults to gain substantial health benefits and maintain independence. To make physical activity a routine habit, choose activities and exercises that are fun, motivate you and keep you interested.

Keep It Going

If you can stick with an exercise routine or physical activity for at least 6 months, it's a good sign that you're on your way to making physical activity a regular habit.

Choose activities:

- You enjoy and believe you'll benefit from
- You can fit into your schedule
- You can do safely and correctly
- That are affordable
- That include friends or family

Keep It Positive

Set realistic goals, regularly check your progress and celebrate your accomplishments. These will keep you on track.

Keep Your Eye on the Prize

Focus on the benefits of regular exercise and physical activity:

- Greater ease doing daily tasks
- More energy to do the things you enjoy most
- Improved health
- Better outlook on life

Find Activities You Enjoy

Some people like to walk on a treadmill at the gym. Others find that kind of activity boring. The key to sticking with exercise is to make it interesting and enjoyable. Be creative. Do things you enjoy but pick up the pace. Do all four types of exercise—endurance, strength, balance, and flexibility. The variety helps keep things interesting!

Try some new activities to keep your interest alive.

Keep Track of Your Progress

The best way to stay motivated is to measure and celebrate your successes. You can find easy-to-use progress forms on the *Go4Life* website. Use these forms to:

- Set and revisit your goals
- Make an exercise and physical activity plan that works for you

Heart Disease Quiz Answers

- 1. **ANSWER: False.** Heart disease is the leading cause of death for men and women in the United States. About 600,000 Americans die from heart disease every year—that's 1 of every 4 deaths. Heart disease is the term used for several types of problems affecting the heart. Coronary artery disease (CAD) is the most common type of heart disease. CAD kills more than 380,000 people every year.
- 2. **ANSWER: 47%.** About half of all American adults have at least 1 of the 3 major risk factors for heart disease—high blood pressure, high cholesterol, and smoking. The more risk factors you have, the more likely you are to develop heart disease. Other risk factors for heart disease include the following:
 - Having diabetes.
 - Not getting enough exercise.
 - Eating an unhealthy diet.
 - Being obese.
 - Having a family history of heart disease.
- 3. ANSWER: More than 600,000. About 735,000

 Americans have a heart attack every year. Of those 735,000 heart attacks, about 525,000 happen to people who have never had a heart attack before. People who have had a first heart attack are more likely to have another one.

That's enough people to fill the largest college football stadium

> 5 times.

4. **ANSWER: All of the above.** There are five major signs and symptoms of a heart attack:

- Pain or discomfort in the jaw, neck, or back.
- Feeling weak, light-headed, or faint.
- Chest pain or discomfort.
- Pain or discomfort in arms or shoulder.
- Shortness of breath.

eating an unhealthy diet.

Other symptoms of a heart attack could include unusual or unexplained tiredness, pain in the upper abdomen, and nausea or vomiting. If you or someone you're with shows any of these warning signs, call 9-1-1 right away.

- 5. **ANSWER: True.** Family members share genes, behaviors, lifestyles, and environments that can influence their health and their risk for disease. Members of a family can pass traits from one generation to another. Some of the traits you inherit from your parents can affect your risk for heart disease. Your risk can increase even more when inherited traits combine with unhealthy lifestyle choices, such as smoking tobacco and
- 6. **ANSWER: Smoking.** Smoking Tobacco raises your blood pressure and greatly

Ingredients:

1 lb extra lean ground turkey breast

1 medium onion chopped

2 tbsp chili powder

2 tbsp unsalted tomato paste

1 tbsp ground cumin

1/8 tsp salt

3 cups cooked brown rice

1 (16 ounce) can unsalted pinto beans rinsed and drained

2 (4 ounce) cans diced green chilies

1 (14 ounce) can unsalted diced tomatoes un-drained

fresh cilantro for garnish

Instructions:

- In a large skillet over medium-heat, cook the mean and onion until brown, stirring to crumble; drain.
- Return meat to skillet.
- Add chili powder, cumin, tomato paste and salt.
- Stir in rice, beans and chilies; heat through.
- 5. Garnish with cilantro if desired.
- Serve immediately.
